PROJECTS

BIKE SAAS APPLICATION WITH ADMIN PANEL | MERN | Tailwind
Live Preview | Github
Developed a Bike SaaS app using MERN, Tailwind, and ShadCN where admins list services, manage bookings, track service status, and generate invoices. Customers can book services, view history, receive notifications, and provide feedback.

DATE WITH DEV HUB FOR JUNIORS | React | Tailwind CSS
Live Preview | Github
Developed a comprehensive learning platform, "Learn Hub," aimed at providing junior students with a centralized resource for their academic and technical growth. The platform features a user-friendly interface and a robust APIS to deliver a seamless learning experience.

CRYPTO MARKETPLACE | React |CSS | Context API
Live Preview | Github
Created a cryptocurrency tracker using React.js and the CoinGecko API to monitor daily updates of all coins. Enhanced my understanding of RESTful APIs and their integration into web applications.

ESSAY COMPILER TO CRACK INTERVIEW | React JS | Shade CN
Live Preview | Github
Frustrated by unreliable online tools, I developed an essay compiler for error-free typing of set passages. Reviewed by the placement cell, it helps juniors with interview preparation, offering real-time feedback on grammar, spelling, and structure, boosting accuracy and confidence in their writing.
